Detail LT Effectiveness Report Cover

METROPOLITAN POLICE DEPARTMENT

*Note: All rankings are from 1 as the highest and 18 as the lowest.

of Nashville and Davidson County

The Detail Lieutenant Effectiveness Report is intended to help maintain focus on the core mission of our patrol units. By measuring our proactive abilities, our reactive responsibilities to Calls For Service, the success of deployment strategies that focus on quality police work (e.g., Terry Stops, Warrant Service, Traffic Stops, arrest for criminal behavior, etc.), then compared to officers available and on task, our ultimate goal of reducing UCR crimes can be continually evaluated. This is a tool to help Lieutenants observe the efforts of their detail by using a well known analysis called TOPSIS (used in the Military, Manufacturing, etc.). In this way, our Lieutenants can monitor the performance of their teams against their own actions, and how that compares to the most ideal state of all the details combined. (For example, In the NFL Quarterbacks have QB Ratings this is a measure of how effective the quarterback is, not how good, during a given season. But as with MOST effectiveness rankings it directly correlates to success.) This tool is intended to help better estimate our core efforts and how those efforts are being directed in our crime fighting, quality of life, and community policing strategies. Please direct any questions or recommendations to the SDD Crime Analysis Unit. *** Also please remember the data used for the calculations in NO WAY WHATSOEVER, in any realm of the imagination, has to do with the daily activity program.

Proactive:

~This is the difference of the last four weeks of self-initiated calls for service compared to the prior four weeks of self-initiated calls for service. If you are ranked highest in this category it means that the percentage of self-initiated activities by patrol designated officers for a given detail increased the most over the last four weeks.
Weight: .15

Reactive:

~This is the difference of the last four weeks of dispatched calls for service compared to the prior four weeks of dispatched calls for service. If you are ranked highest in this category it means that the percentage of calls for service received by patrol designated officers for a given detail increased the most over the last four weeks.
Weight: .15

Quality: Is a series of ratios summed that result in an ending score.

~The ratio of the number of terry stops that result in an arrest divided by the total number of terry stops.

~The ratio of the number of warrants served divided by the total number of warrant service attempts. This number has a threshold if the threshold number is breached the resulting ratio is zero. (For example you cannot serve a warrant without first attempting to serve. So if Spot has an outstanding warrant, you looked at his house, he wasn't there update WARAUD. 1 attempt. If the next day you pull Spot over you run him for warrants and he has one and you serve it update WARAUD this is 1 attempt and a service. Totals 2 attempts and 1 service = 50% service ratio. In laymans, if you touch a warrant touch WARAUD and update the file.)

~The ratio of the number of traffic stops that result in an arrest divided by the total number of traffic stops.

~This is the difference of the last four weeks of persons arrested compared to the prior four weeks of persons arrested.

~The ratio of the number of accidents that result in an injury divided by the total number of accidents. This measure is subtracted after all other values are summed.

If you are ranked highest in this category it means the total combined score of the five measurements above was the highest.

Weight: 3

Results:

~The difference of the last four weeks of UCR compared to the prior four weeks of UCR. Corrected with the multiplication of negative one to correct for the positive score. If you are ranked highest in this category it means that the percentage of UCR Part One crimes reported decreased the most over the last four weeks.

Weight: .3

Correction:

~This is a ratio of the total actual minutes worked by individuals in a given detail divided by the total expected minutes worked for the last four week period.

If you are ranked highest in this category it means that the percentage wise you had the least amount of patrol resources available for the last four weeks.

Weight: .10
